FOREWORD

Within the limits of its size, it is hoped that in this work there will be found a more precise and detailed definition of equivalents between the two languages than in any other Spanish-English—English-Spanish Dictionary. By the abundant use of explanatory words in brackets preceding successive equivalents, it is intended to make impossible for example the misapplication of "**salvaje**", "**wild**", to "**flores**" or "**cannon**", "**carambola**", to "**artillery**". It is not claimed that the single explanatory word covers all the meanings (Spanish or English) of the equivalent. See the articles "**hot**", "**land**", "**procession**", "**power**", "**ring**". Descriptive equivalents of words or phrases have been substituted by true equivalents, particularly in the abundant colloquial forms included in both alphabets. To provide space for these refinements, and for the figured pronunciation (see below), every effort has been made to exclude from each alphabet the narrowly technical or totally passive vocabulary which so clutters up most dictionaries and, simultaneously, to make one form serve duty for several. So that words which convey no clear image of action or object to the educated native should be sought elsewhere in an all-Spanish or all-English dictionary; while, on the other hand, normally formed adverbs or nouns, e.g. *unduly*, *suavemente*, *verificación*, are frequently represented only by the adjective or verb from which they are made. The reader is asked to collaborate to the limits of his intelligence.

ADVERTENCIA

Confiamos en que dentro del tamaño de esta obra aparezcan las equivalencias entre los dos idiomas de una manera más precisa y detallada que en ningún otro diccionario inglés-español, español-inglés. Mediante el empleo de abundantes palabras explicativas (que van entre paréntesis delante de las sucesivas acepciones) se ha procurado hacer imposible, por ejemplo, el que se elija "**salvaje**" "**wild**", refiriéndose a "**flores**", o "**cannon**" "**carambola**" a "**artillery**". No se pretende agotar con esta sola palabra explicativa todos los sentidos—ingleses o españoles—de la palabra a traducir. Véanse los artículos "**hot**", "**land**", "**procession**", "**power**", "**ring**". Se ha evitado también el uso de descripciones, tratando de dar la palabra o frase equivalente única, en particular en el caso de formas idiomáticas. Para dar cabida a estas indicaciones

CC-0. Agamnigam Digital Presevation Foundation, Chandiga

explicativas, y a la pronunciación. Se ha esmerado el autor en excluir de ambos idiomas aquellas voces o poco usadas o excesivamente técnicas que tanto contribuyen a abultar otros diccionarios. Estas palabras o frases deben buscarse directamente en un diccionario totalmente inglés o español. Con el mismo objeto de recoger en pequeño volumen el mayor número de voces esenciales, se ha prescindido a menudo de aquellas formas (adjetivos, adverbios, etc.) cuyo sentido y ortografía puede determinarse fácilmente partiendo de la forma principal, sustantivo o verbo (véanse: "**unduly**", "**suavemente**", "**verificación**"). Cree el autor que gracias a estas innovaciones podrá este diccionario competir con otros de mayores dimensiones.

THE FIGURED PRONUNCIATION

Each main entry in this part is given a "figured pronunciation" so planned as to represent as exactly as possible the sound and the accentuation of the Spanish word. The figured pronunciation [in square brackets] must be read *as though it were an English word*. A hyphen separates each syllable from another; the accented syllable is clearly marked [ka-bay'-tha]. Bearing in mind the fact that *all vowels* in Spanish are pure, that is, single sounds, not diphthongs, and that, with the exception of the "h", there are no *silent* letters, the following indications should make it possible *at sight* to pronounce correctly every word represented in this part of the dictionary:

Vowels

[*a*] [*ah*] represents the sound *a* in the English word **aha!**
[*ay*] represents the sound *ay* in the English word **pay.**
[*e*] represents the sound *e* in the English word **men.**
[*ee*] represents the sound *ie* in the English word **field.**
[*o*] represents the sound *o* in the English word **on.**
[*oo*] represents the sound *oo* in the English word **goose.**
[*ow*] represents the sound *ow* in the English word **cow.**

Consonants

[*b*] and [*v*] are really the same essential sound, but the pronunciation varies according to the position of the letter in the word and the position of the word in the sentence. When the sound [*b*] or [*v*] is initial in a word, and the word is initial in a sentence, or when it comes immediately after the letters *n* or *m*, the pronunciation of [*b*] and [*v*] is that of the English *b* in **bible.** Elsewhere, and especially between vowels, it is a softened form of the English *b*, known to phonetics as a *bilabial fricative* [*v*].
[*ch*] represents the *ch* in the English word **church.**
[*d*] is more palatalized than the English *d*; between vowels and at the end of a word it is regularly pronounced as the *th* of the English **there**, even at times becoming silent.
[*g*] always represents the *g* of **goat.**
[*h*] always represents a guttural sound like the *ch* of **loch** or the Welsh **bach.**
[*ly*] represents a back palatal pronunciation of the "*lli*" in **pillion.**
[*ny*] represents the *ny* of **canyon.**
[*r*] always represents a trilled *r* and *must never be omitted in*

CC-0. Agamnigam Digital Presevation Foundation, Chandiga

pronunciation. Where the Spanish word has a double *rr*, the trill must be repeated.

[*t*] is a more palatalized sound than the *t* of **coat.**

[*th*] represents the *th* of the English word **thick.**

[*v*] See [*b*] above.

[*y*] (except in *ay* above) is a consonant, and is pronounced as the *y* of **yet,** *never* as the *y* of **only.** Thus it cannot form a separate syllable of its own. **Ciudad** [*thyoo-dad'*], **uña** [*oo'-nya*] have each only *two* syllables.

NOTE ON SPANISH-AMERICAN PRONUNCIATION

In the Spanish-speaking countries of Central and Southern America certain deviations from the Castilian pronunciation, which has been taken as the standard in this Dictionary, are to be found. They are, in the main, not peculiar to the Americas, but are the reflections of a pronunciation also native to many regions of Spain. The two sounds specially affected are those of the letter *ll* and of the *z* and the *c* before *e* and *i*.

ll is pronounced with a stronger guttural sound, similar to the English *y*: **Calle** becomes [Ka'ye]. In the River Plate countries particularly a further strengthening of articulation produces a sound like the English *si* of invasion which has been represented with the symbols *ŝy* (q.v.) N.B.—A similar strengthening of articulation turns the Castilian *y* also in some regions into *ŝy*: e.g. yo [yo] becomes [ŝyo].

z in all positions and *c* before *e* or *i* become [s]: **lápiz** becomes [la'pees] and '**Doce caballeros cenan en la calle**' becomes [Do'se ka-ba-ye'ros se'nan en la ka'ye]. Apart from these main differences, there are between different countries certain variations of articulation and intonation (e.g. the Mexican final *s* is more sustained) which are noticeable, but not fundamental.

NOTE ON THE SPANISH ALPHABET

In the Spanish alphabet the symbols 'ch' and 'll' have the value of separate letters. Words beginning with them are therefore alphabetized separately at the end of the letters 'c' and 'l'. Similarly within a word the symbol 'ch' is alphabetized after the letters 'cz' (*not* cg), and the symbol 'll' after 'lz' (*not* 'lk'), so that 'pecho' follows 'peculio' and 'callado' follows 'calzón'.

PRONUNCIACIÓN INGLESA

Para saber cómo se pronuncia y se acentúa cada palabra inglesa, se debe leer la transcripción entre paréntesis [ ], *pronunciándola como si fuera palabra española*. Cada sílaba va entre rayas y la sílaba acentuada lleva su acento correspondiente así [*am-bi -shəs*]. Ciertas letras españolas que varían de pronunciación según su posición (p.ej. la "g" de **ganar** y la de **genio**), y ciertos sonidos del inglés desconocidos en castellano (p.ej. el "sh" de **shall**), se encuentran representados por unos símbolos que *siempre tienen el mismo sonido*, cualquiera que sea su posición, o por ciertas combinaciones de estos símbolos. Este sistema lo hemos puesto a la prueba con muchos amigos de lengua española. Teniendo pues en cuenta las siguientes indicaciones, el lector no puede menos de pronunciar las palabras inglesas con la mayor corrección posible:

Vocales

[*i*] representa una "i" más breve y abierta que la castellana.
[*ii*] representa la "i" castellana algo prolongada.
[*ə*] representa el sonido de la mayoría de las vocales inglesas sin acentuar (p.ej. **vestment** [*vest'-mənt*], **villager** [*vi'-lə-dyə*], **voracious** [*vo-rey-shəs.*] Compárese el artículo francés: **le**.
[*əə*] representa el mismo sonido prolongado.
Los otros símbolos vocálicos se pronuncian como en castellano

Consonantes

[*b*] representa la "b" después de pausa, como en **Buenos días**.
[*d*] representa la "d" después de pausa, como en **Dámelo**.
[*g*] *en cualquier posición*, representa la "g" de **ganar**.
[*j*] representa una "h" aspirada semejante a la "jota" castellana aunque menos fuerte.
[*ng*] representa un sonido nasalizado (Comp. cón*y*uge), con pronunciación débil de la "g".
[*s*] representa la "s" de **sano**.

CC-0. Agamnigam Digital Preservation Foundation, Chandigarh

[ŝ] representa el mismo sonido, sonorizado, de **desde**. Comparar [ŝ] con **poison** [s].

[v] representa un sonido pronunciado con el labio inferior contra los incisivos superiores. Comp. francés: **vivre**.

[w] representa la "u" española, primer elemento de diptongo, como en **huerta, huida, agua**.

[z] representa la "z" de **zurdo**.

[ẑ] representa el mismo sonido, sonorizado, como la "z" de **juzgar**.

[dy] representa el sonido difícil, desconocido en español, de la "g" de **German** o la "j" de **John**. Comp. la pronunciación argentina de la doble "ll": como en **caballo, calle**. Es un solo sonido formado de la "d" española con la "j" del francés **jamais**.

[sh] representa otro sonido desconocido en español. Comp. el francés **chagrin, cheval**.

[ŝy] es el francés "j" de **jamais, Jean**, que en inglés se representa de diferentes maneras como: **invasion** [*in-vey-ŝyən*], **erasure** [*i-rey-ŝəy*], **azure** [*ey'-ŝyə*].

Las otras consonantes se pronuncian como en castellano.
